
What you'll learn

Space planning

Project management (cradle to grave or tailored)

Ways of buying

Trends we're seeing in education

How are teaching styles are changing

Technologies affect on how children are learning

How to keep up

Trends

Driving forces

Architectural walls

Why you should come

You can't afford not to. If you want to see what the trends are and know if you are in the game then you should come. Take the guess work out of what to purchase and how. Give educated input the next time you are looking at buying any kind of furniture.

It's usually the last thing People think about, so consider the long term ramifications. Understand how to get the most out of your investment with the most functional furniture.

Be educated on what the future of classrooms looks like since you are responsible for sustaining them.

WYOAPPA 101
