

Efficiency and Quality with Digital Inspections

An Archaio Webinar for APPA International Membership
Thursday April 20th, 2017 | 12pm PST / 3PM EST

Archaio is a streamlined, intuitive facility management software platform that empowers building owners, operators and facility manager to dramatically increase the efficiency of their inspection and maintenance efforts, ensure total accountability and shield themselves from costly litigation. With real-time reporting, advanced analytics and unlimited storage of historical data, you'll always know exactly what's going on in your facility – and how to make things even better.

Archaio Maintenance Management Agenda

12:00-12:15 - How digital inspections streamline facility management
